BACTERIAL TREATMENT FOR

Municipal Wastewater • Collection Systems • Industrial Wastewater
Lift Stations • Septic Systems • Lagoons & Ponds • Grease Traps

FACILITIES

- Wastewater Treatment Plants
- Industrial Plants
- Food Processing Plants
- Petrochemical Industries
- Refineries
- Meat Processing Plants
- Wineries
- Dairies
- Pulp and Paper Mills
- Restaurants & Food Industry

BIOAUGMENTATION

To reduce or degrade organic wastes and pollutants with naturally occurring microorganisms. Each Bio Clean Product is formulated specifically with naturally occurring bacteria blended with bionutrients and stimulants. The bacteria are selected for their ability to rapidly and completely degrade organic solids. Both aerobic and facultative anaerobic bacteria are used to ensure optimum performance.
