

Stormwater Compliance Services

THE SYSTEM IS ONLY AS GOOD AS THE MAINTENANCE

Bio Clean

A Forterra Company

Overview

Bio Clean Environmental Services, Inc. offers a complete cleaning and maintenance program for your stormwater BMPs. Our service includes detailed maintenance reporting and disposal of collected discharge in accordance with federal, state and local regulations.

Our certified service technicians are highly qualified and hold years of experience in servicing all types of BMPs and manufacturers' products.

All stormwater treatment systems, proprietary and non-proprietary, require routine and trackable maintenance to ensure proper functioning and extend the useable life.

Our philosophy of preventative, routine maintenance will be the most cost-effective method over a long period of time. Regular and frequent cleaning intervals will detect minor issues before they become large and expensive.

Our goal is to preserve clean water while keeping you in compliance with regulations. Under the Stormwater Phase II rule, owners and operators are responsible for BMP inspection and maintenance programs.

We are dedicated to provide the finest quality service at price-competitive costs.

PROVIDING INSPECTION, MAINTENANCE & REPAIR PROGRAMS FOR STORMWATER BMPS

Stormwater Compliance Services

THE SYSTEM IS ONLY AS GOOD AS THE MAINTENANCE

Catch Basin Filters

Curb Inlets - Grate Inlets

- Remove trash, debris & sediment from filter - performed by hand or vactor truck
- Power wash filter
- Inspect filter components for damage
- Evaluate/replace hydrocarbon boom
- Replace or repair fabric filter
- OSHA confined space entry may be required
- Transport & dispose collected discharge according to regulations

Biofilters

Bioretention - Bioswales - Wetlands - Tree Box

- Supplement irrigation during initial years
- Vegetation maintenance - trim & weed, plant replacement
- Mulch & soil media replacement
- Repair erosion areas
- Remove trash, debris & sediment
- Maintain & repair inflow/outflow structures

Detention Basins/Infiltration Basins

- Clean & remove trash, debris & sediment
- Manage vegetation
- Repair erosion on embankment and side slopes
- Maintain & repair inflow/outflow structures

Vault Systems

Hydrodynamic Separators - Media Filters - Oil Water Separators - Underground Storage

- Inspect to determine need for maintenance
- Examine structural integrity & operational conditions (according to unit specifications)
- Remove trash, debris & sediment in vault using vactor truck
- If vault entry is required, OSHA rules for confined space entry must be followed
- Replace filter media or cartridges
- Transport & dispose collected discharge according to regulations

The Right Maintenance at the Right Time

All service technicians are trained and certified to conduct Confined Space Entry Operations in accordance with Cal-OSHA and FED OSHA. Bio Clean carries all required insurance coverage. Insurance Certificates available upon request.
